

Wellness Now Agencies and Resources

Oklahoma Behavioral Health Agencies

Crisis Intervention Centers

Non-hospital emergency services for adults, eighteen (18) and older, with mental health, substance abuse, or co-occurring issues. Consumers may be admitted up to three (3) days, with services including, but not limited to, observation, evaluation, emergency treatment and referral, when necessary, for inpatient psychiatric or substance abuse services.
ok.gov/odmhsas/Mental_Health/Adult_Crisis_Centers.html

Community Mental Health Centers

Located within each of the service areas in Oklahoma is a publicly supported Community Mental Health Centers (CMHC). There are fifteen CMHCs, five of which are state-operated facilities and the other ten are contracted non-profit providers. They cover all 77 counties in Oklahoma. Most centers have satellite offices or other specialized programs within their service areas. The CMHCs provide screening, assessment and referral services, emergency services, therapy, psychiatric rehabilitation, case management, and other community support services designed to assist adult mental health consumers in living as independently as possible and to provide therapeutic services for children who are demonstrating symptoms of emotional disturbance. All CMHCs provide services to both adults and children.
ok.gov/odmhsas/Mental_Health/Mental_Health_Centers_by_City/index.html

A Chance to Change

Provides a continuum of care including prevention, education, intervention and outpatient counseling. Trained and experienced counselors offer individual, family, and group counseling for children, adolescents and adults throughout the state of Oklahoma. Counseling is provided for substance abuse, problem gambling, other addictions, codependency, family and marital issues, grief, anxiety, depression, trauma, and other related issues. Whether in person or via our secured internet portal telehealth program, specialized counseling and support services are available to you and your family. For more information, visit our website at achancetochange.org, call our office at 405.840.9000 or email us at info@achancetochange.org.

Cedar Ridge Residential Treatment Center

Provides inpatient and extended residential psychiatric treatment for children, adolescents, and adults. Call 405-605-6111 for all services.
cedaridgebhs.com

Green Shoe

Offers an opportunity for transformational change and healing through our five-day retreat to help resolve past less than nurturing experiences including from childhood. With a focus on relationships, codependence, boundaries, and the effects of childhood trauma on emotional development, our free five-day retreats feature opportunity for transformational change, a focus on personal growth, self-actualization, and personal and professional success in forming and maintaining relationships. We work with adults in a trauma-informed setting to raise their awareness of how past family roles and family systems influence their current relationships. The Green Shoe Foundation is a non-profit organization committed to improving and impacting individual lives and communities through self-discovery, awareness, education, programs and resources. National Council for Behavioral Health

TheNationalCouncil.org

To locate mental health and addictions treatment facilities in your community, use the "Find a Provider" feature on the National Council's website.

National Empowerment Center

power2u.org

The mission of the National Empowerment Center is to carry a message of recovery, empowerment, hope, and healing to those diagnosed with a mental illness. The center provides information and advocacy resources.

National Institute of Mental Health

Mental Ill among Us Adults

nimh.nih.gov/health/statistics/prevalence/any-mental-illness-ami-among-us-adults.shtml

The National Institute of Mental Health website provides prevalence statistics pertaining to mental illness, including data by age, gender, and race.

President's New Freedom Commission on Mental Health

govinfo.library.unt.edu/mentalhealthcommission/reports/reports.htm

This commission report was released in 2003 as part of an effort to eliminate inequality for Americans with disabilities. It was tasked to "promote successful community integration for adults with a serious mental illness and children with a serious emotional disturbance." The final report describes problems and gaps in the US mental health system and makes recommendations for improvements at the federal, state, and local levels of government, as well as private and public health care providers. A key recommendation calls for a "recovery-oriented mental health system."

World Health Organization

Disability from Mental Illness

who.int/topics/global_burden_of_disease/en/

The World Health Organization website contains information on the global burden of disease in various parts of the world, including burden due to mental disorders. It gives projections into future years, when the burden of mental disorders is expected to greatly increase.

PODCASTS:

Art of Happy Living™ Podcast Focusing on the healing connection between mind, body and spirit, R. Murali Krishna, M.D., presents The Art of Happy Living™ series as stepping stones in the journey toward leading happier, healthier lives.

The One You Feed Conversations about Creating a Life Worth Living- Named Best of 2014 by iTunes. Open minded discussions of habits, meditation, wisdom, depression, anxiety, happiness, psychology, philosophy, and motivation. "This podcast saved my life"- Amy W

The Overwhelmed Brain: Personal Growth for Critical Thinkers Anxiety, depression, fears, obsession, panic, or any relationship, marriage or family issues, this show will help you achieve less stress and more happiness. Become empowered and honor yourself so that you can make decisions that are right for you. Mindfulness, compassion and being in the present moment are only components of a bigger picture. Live authentically and strengthen your emotional intelligence to avoid emotional abuse. Get to the root of emotional issues. If you're annoyed with affirmations and tired of being told to "think positively!" this is not your typical NPR or Tony Robbins podcast. Start creating the life you want today.

The Dark Place: Honest Conversations About Mental Health A shame-free space where people talk about their struggles, difficult past memories, and what it's like to live with mental illness. Common topics include depression, anxiety, abuse, and trauma. No matter the story, it will be met with compassion.

Conquer Stress, Depression & Anxiety If you are looking for ways to feel better and conquer depression, anxiety, and stress - The Conquer Stress, Depression and Anxiety Podcast is for you. Dr. Bob Acton is dedicated to bringing you up-to-date, cutting edge strategies and techniques to help you be happy, be resilient, and live the life you want.

SelfWork with Dr. Margaret Rutherford We all have things in our lives we want to change. Dr. Margaret has a direct, down-to-earth approach to mental health treatment, and uses her twenty years of experience to guide you toward the changes you want. No psychological jargon here! Dr. Margaret uses a solution-oriented approach to depression, anxiety, trauma or grief -- what she calls, "What You Can Do About It.

Stop The Bully Within Are you tired of that critical voice inside your head telling you that you're not good enough or that something is wrong with you? That voice is your Inner Bully and it's holding you back and destroying your self-esteem and self-confidence. You don't have to listen to that voice anymore! Tune in each week to get bite-sized info and easy, actionable steps to transform your Inner Bully into your own Best Friend and Personal Champion for success! We'll share tips and techniques to help you create that positive and powerful mindset needed to be happy, confident, and successful in life. This show was created with teens and young adults in mind, but the content can help anyone who is ready to take control of their lives.

Happiness Isn't Brain Surgery Sister podcast to Counselor Toolbox. Happiness was launched to provide easily accessible tips, tools and tricks to help people achieve their highest quality of life. Each week we delve into topics that will help you enhance your happiness, better deal with addictions, anxiety, depression and understand the interaction between mood, physical health and addiction.

APPS:

Relax Lite ** Voted Top Mind & Body App of 2014 by Leading Doctors ** Effective and rapid stress relief in 5 minutes. De-stress with guided breathing and meditation exercises that use calming music to promote relaxation. It's an ideal stress management tool, being simple and intuitive.

Finding time to relax can be very difficult for most people. This app can be easily integrated into your daily life. "Relax" by "Saagara" enhances the way you feel and leaves you with more energy, stamina, and focus. The more you use it, the better and more effective the results.

Headspace is the simple way to reframe stress. Sleep trouble? Meditation creates the ideal conditions for a good night's rest. Relax with guided meditations and mindfulness techniques that bring calm, wellness and balance to your life in just a few minutes a day. Get more from your day through mindfulness, be less distracted and reactive, and focus on the things that matter most to you. Our Basics course is completely free and will teach you the fundamental techniques of meditation and mindfulness. After that, by subscription, gain access to the full Headspace meditation library. Train your mind with guided meditations on everything from stress to sleep, and anxiety to relationships. Bring more awareness to daily activities through on-the-go exercises, and use SOS sessions to skillfully manage moments of panic or anxiety. The Headspace animation library is full of tips and helpful wisdom to keep your practice on track, and you can even add friends to keep each other motivated.

Stop, Breathe & Think: Meditation and Mindfulness by Stop, Breathe & Think

Stop, Breathe & Think is an award winning meditation and mindfulness app that is proven to decrease anxiety and stress. It allows you to check in with your emotions, and recommends short guided meditations, yoga and acupressure videos, tuned to how you feel. Our personalized meditation and mindfulness experience won the 2017 Webby People's Voice Award for Best Health App, and has been featured by the Today Show, Apple, Cosmopolitan, Marie Claire and many more.

Calm was branded as Apple's "App of the Year" in 2017. The app is designed to reduce anxiety, improve sleep, and help you to feel happier by focusing on the four key areas of meditation, breathing, sleep, and relaxation, with the aim of bringing joy, clarity, and peace to your daily life. The app delivers meditations that can help you to destress, as well as breathing programs, music, and sounds from nature to relax your mind and body and promote better sleep. Calm is the perfect app if you are new to meditation, but it also offers programs for more advanced user with sessions available in lengths of 3–25 minutes, to fit in with your schedule.

Calm in the Storm is a valuable tool in understanding what stress is, the effects it can have on the body, mind and spirit and how to recognize when stress levels become unhealthy and even dangerous. The app helps you to identify, assess and track your own stress levels and provides easy-to-use and highly effective mind/body practices. Calm in the Storm guides you in creating a personalized virtual hope box and links to local resources that can support you in times of distress or crisis. It also helps you manage suicidal thoughts and create individualized plans for keeping you safe.

Happify is a space to build resilience and overcome negative thoughts and stress. Whether you are feeling stressed, anxious, or sad, this app helps you regain control of your thoughts and feelings - 86 percent of the app's users report feeling better about their lives after 2 months of use. Happify employs techniques and evidence-based interventions in the areas of CBT, positive psychology, and mindfulness to help you break old and unhealthy patterns and form new, healthful habits. The app offers activities and games to improve your life satisfaction and ability to fight negativity. Your emotional well-being is calculated as a happiness score that you can improve upon each week.

Moodnotes is a thought journal and mood diary. The app can be used to capture your feelings and improve your thinking habits through the implementation of CBT and positive psychology.

Track your mood and increase self-awareness of what influences it. Learn to recognize "traps" in your thinking and ways to rethink the situation. If you happen to enter a "thinking trap," the App will provide suggestions and useful perspectives to reduce stress and enhance well-being. Progress is viewable in the helpful "Insights" dashboard.

SuperBetter is a game focusing on increasing resilience and the ability to remain strong, optimistic, and motivated when presented with challenging obstacles in life. A study by the University of Pennsylvania found that when people played SuperBetter for 30 days, their mood improved, symptoms of anxiety and depression decreased, and self-belief to achieve goals increased. The app will help you to adopt new habits, improve your skills, strengthen relationships, complete meaningful projects, and achieve lifelong dreams. It also has the potential to help you improve depression and anxiety, cope with chronic illness, and recover from post-traumatic stress disorder (PTSD).

7 Cups provides online therapy and emotional support for anxiety and depression.

There are more than 160,000 trained listeners and licensed therapists who are available to anonymously speak with 24/7. Speak your mind and confide in listeners without the fear of being judged. These listeners can be searched for based on their experience specialties, such as: bullying, panic attacks, eating disorders, relationship breakups, and many more. Affordable therapy with an online therapist can commence one-to-one in a confidential setting.

Talkspace is a counseling and therapy app that connects users with a convenient, affordable, and confidential way to deal with anxiety, stress, depression, relationship issues, and chronic illness. A free consultation is provided with a Matching Agent to identify the ideal therapist for your needs based on several factors. More than 1,000 licensed therapists are available, who specialize in anxiety, phobias, depression, domestic violence, PTSD, and more. After upgrading and becoming a member, access is given to a secure chat room where you can raise and discuss your worries with your private counselor. The app's pricing plans are described as being approximately 80 percent lower than traditional office-based appointments.

T2 Mood Tracker helps individuals track their emotional states and how they change over time for personal insight and accurate reporting to a mental health professional. The skills taught may be applied to individuals with depression, anxiety, stress, trauma-related feelings, any other self-identified emotional states, as well as Traumatic Brain Injury (TBI), chronic pain; customizable for sleep and other issues.

CBT-i Coach is for people engaged in cognitive behavioral therapy for insomnia (CBT-i) with a health provider, or those who have experienced symptoms of insomnia and would like to improve their sleep habits. The app guides users through the process of learning about sleep, developing positive sleep routines and improving their sleep environments. It provides a structured program that teaches strategies proven to improve sleep and help alleviate symptoms of insomnia.

Together Strong In this interactive experience, you'll engage in role-play conversations with virtual veterans and service members to learn how to best help them work through the challenges of civilian life, including those related to work, family, finance, post traumatic stress, and mental health. The app provides a safe space where you can learn and practice these challenging conversations to connect those in need with help, building skills and confidence to have these conversations in real life. You'll receive personalized feedback in the moment, explaining why your conversation choices are successful or not successful and how to improve them. The conversation skills taught in this resource are based on Motivational Interviewing (MI), a set of evidence-based techniques for problem-solving and building motivation for change.

Breethe – Meditation Guided

De-stress & sleep better in only 10 min with your personal mindfulness coach! Breethe is the easiest way to meditate! Learn simple mindfulness and meditation techniques to help you bring more happiness, calm and peace of mind into your life. Relax, sleep better, lose weight, sharpen your mind, and improve your relationships — in just 10 minutes a day! This meditation app includes hundreds of daily meditations, and a wide variety of other guided meditations to help you deal with specific issues such as weight loss, insomnia, anxiety, work performance, trouble sleeping, etc. It even has a mindfulness program for kids. Selected Best New App by Apple in 95 countries.

HELPFUL RESOURCES: FOR DEPRESSION AND SUICIDAL INTENTIONS

WEBSITES:

American Association of Suicidology

suicidology.org

Founded in 1968, the American Association of Suicidology (AAS) promotes research, public awareness programs, public education, and training for professionals and volunteers. In addition, AAS serves as a national clearinghouse for information on suicide.

Postpartum Support International

postpartum.net

Postpartum Support International's (PSI's) website receives more than 100,000 visitors a year who resource PSI for support, education, and local providers. PSI's toll- free help line serves more than 1,000 callers a month and is staffed by a volunteer team of PSI- trained responders who rapidly refer callers to appropriate local resources, including emergency services. 800- 944- 4PPD (4773).

Progressive Relaxation

hws.edu/studentlife/counseling_relax.aspx

Two progressive relaxation tapes can be downloaded from the website of Hobart and William Smith Colleges in Geneva, New York.

Suicide Prevention Resource Center

sprc.org

The Suicide Prevention Resource Center has fact sheets on suicide by state and by population characteristics, as well as on many other subjects.

BOOKS:

These two self- help books based on CBT for depression have been found effective in trials:

Burns, D.D. (1999) *Feeling goo: the new mood therapy (revised edition)*. Quill Publishers, New York, NY.

Lewinsohn, P.M., Munoz, R.A., Youngren, M.A., Zeiss, A.M. (1992) *Control your depression (revised edition)*. Simon & Schuster, New York, NY.

Other books that may be useful:

Bieling, P.J. and Anthony, M.M. (2003) *Ending the depression cycle*. New Harbinger Publications, Oakland, CA.

This is a depression relapse prevention workbook based on CBT principles.

Ellis, T.E. (1996) *Choosing to live: how to defeat suicide through cognitive therapy*. New Harbinger Publications, Oakland, CA.

This CBT- based self- help book focuses on learning thinking strategies for overcoming suicidal thoughts.

Greenburger, D., and Padesky, C. (1995) *Mind over mood: change how you feel by changing how you think*. Guilford Press, New York, NY.

This is a CBT- based self- help book for depression, anxiety, and interpersonal problems.

Knaus, W.J. (2012) *The cognitive behavioral workbook for depression, second edition: a step- by- step program*.

This CBT manual can be used alone or in conjunction with therapy. It also can be purchased as an eBook directly from the publisher (newharbinger.com).

PODCASTS:

Suicide Buddies: The show is half laughing in the face of death and half urging you to be good to yourself, because Dave and Hampton are alive, and they want you to stay alive, and they're hoping a full hour of the world's darkest jokes will help. Join them as they analyze one suicide in history and share their own experiences with suicide and suicidal thoughts.

Letters to my kids: A suicide survivor's lessons and advice for life "The pessimist complains about the wind; the optimist expects it to change; the realist adjusts the sails." This world can be filled with challenges, failure, and darkness, but life is so much more than just survival. Hosted by a two-time suicide survivor, Letters to My Kids confronts these issues head-on through personal stories filled with humor, honesty, and realistic optimism.

Depressed Not Dead (jamoalki) -Battling depression and suicide By jamoalki Join me as I attempt to rise above my depression and suicidal ideations.

Join **Rocky Mountain MIRECC for Suicide Prevention Short Takes on Suicide Prevention** to hear leaders in the field. We are especially interested in topics related to Military Veterans. Topics will be relevant for Veterans, care-givers, clinicians and researchers.

The New Psychology of Depression We live in a world filled with material wealth, live longer and healthier lives, and yet anxiety, stress, unhappiness, and depression have never been more common. What are the driving forces behind these interlinked global epidemics? In this series, Professor Mark Williams (Wellcome Trust Principal Research Fellow at Oxford University) and Dr. Danny Penman discuss the recent scientific advances that have radically altered our understanding of depression and related disorders. Also discussed is the latest treatments and therapies that are offering hope to those suffering from depression.

Fatherless by Suicide is a collaborative storytelling project by and for sons whose fathers died by suicide

1, 2, Many: Veteran Suicide with Timothy Lawson This podcast tells the stories behind veteran suicide. Hear from veterans, their families, and medical professionals about this important topic.

Depression If God is loving, then why are we blue? This podcast contains sermons of hope and encouragement for those who are hurting or depressed. This is a religious podcast.

Hilarious World of Depression A show about clinical depression... with laughs? Well, yeah. Depression is an incredibly common and isolating disease experienced by millions, yet often stigmatized by society. The Hilarious World of Depression is a series of frank, moving, and, yes, funny conversations with top comedians and funny creative people who have dealt with this disease, hosted by veteran humorist and public radio host John Moe. Winner of the Webby Award for Best Comedy Podcast. Join guests such as John Green, Russell Brand, Margaret Cho, Wayne Brady, and Wil Wheaton to learn how

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. they've dealt with depression and managed to laugh along the way. If you have not met the disease personally, it's almost certain that someone you know has, whether it's a friend, family member, colleague, or neighbor. Depression is a vicious cycle of solitude and stigma that leaves people miserable and sometimes dead. Frankly, we're not going to put up with that anymore. The podcast is not medical treatment and should not be seen as a substitute for therapy or medication. But it is a chance to gain some insight, have a few laughs, and realize that people with depression are not alone and that together, we can all feel a bit better. This podcast is made possible by a grant from HealthPartners' and its Make It Okay campaign which works to reduce the stigma of mental health. makeitok.org

Mentally Ch(ill) - A humorous conversation about depression hosted by comedians Kristen Carney and Stevie Ryan. Tragically, Stevie passed away but Kristen continues to post new episodes weekly.

Depression 180: Turn It Around On this show we're going to discuss depression, we're going to cover a lot of the facts and myths about depression: what depression really is, what are the real reasons depression may show up in your life, we'll talk about antidepressants and what they actually do in the brain and we'll go over some scientifically proven methods for eliminating depression.

Wrestling with Depression is an internet radio program hosted by comedian Marty DeRosa. The show brings on other comedians, wrestlers, and performers to talk about some of the unseen sides of entertainment. About how they deal with their own sadness, depression, or other emotions that you might not expect to hear from stage and screen personalities. Don't worry though, it's not all sad, some parts are pretty funny! This is no clinical advice, and we're no doctors! What you will get are stories from real people, who have had to face depression in their own lives.

Unhinged: Discussing Mental Health An in-depth look at a 30 year friendship between a man, afflicted with a lifetime of treatment-resistant depression, and his best friend, who has had to helplessly watch him battle this dreadful disease, year after year. More often than not, this disease kills friendships and causes major family conflict due to the fact that this is a disease people most often cannot see, and simply are not capable of dealing with its many challenging issues

Giving Voice to Depression Depression affects more than 350,000,000 worldwide. So basically, if you don't have it yourself, you know someone who does. This podcast was founded to start discussions that reduce stigma and promote understanding. We look at depression from many angles. A journalist with depression pre-produces short (7-10 minute) interview segments, and then the sister co-hosts, who both live with depression, comment on the issues presented. The episodes are informative and hopeful-- and seldom depressing. It's time to shine some light on depression's darkness!

The End Depression Podcast Being your self is being awesome.

Depression Session Laura Milkins is a multimedia, interactive performance artist, living in Tucson and teaching Art and Visual Culture at Pima Community College since 2012. She received an MFA in painting from University of Arizona in 2008. In 2009, she was a Fulbright Scholar in Mexico City. For this public performance, "Walking Stories: Mexico", Milkins walked across Mexico City in the company of strangers, posting the stories they

shared each night on a BLOG. Recent work includes “The Kindness Project”, spending a year contemplating kindness, and “Walking Home: stories from the desert to the Great Lakes”, in which Milkins walked 2,007 miles from Tucson to Michigan wearing a live webcam. Since 1993, Laura has been organizing art shows, performances and festivals, and has received grants, awards and international recognition for her work. Her performances focus on community and social interactions, and the role that technology plays in both.

Adventures with Postpartum Depression Postpartum depression is the most common pregnancy complication but it is still highly stigmatized. All too often, moms with postpartum mood disorders feel alone and ashamed of their symptoms when in reality, thousands of moms across the world are experiencing this illness at the same time. By sharing stories, this show seeks to end the stigma and help women kick postpartum depression in the ass.

APPS:

HELP Prevent Suicide ([Android](#), [iOS](#)) keeps its approach short and simple, with a home screen that puts the National Suicide Prevention Lifeline contact number front and center, while also providing concise warning signs of suicide ideation and guidelines for how to help and ask a friend about potentially suicidal thoughts. Additional resources include a page of helpline numbers, online resources, and addresses and contact numbers for Oklahoma-based crisis centers.

Jason Foundation: A Friend Asks ([Android](#), [iOS](#)) is a free app by the suicide prevention group Jason Foundation. It aims to teach its users how to recognize the signs that someone close to them may be thinking about suicide, and how to reach out to them proactively. The app provides users with a list of common warning signs of suicide ideation, do's and don'ts for such a sensitive situation and easy access to resources such as the National Suicide Prevention Lifeline.

MY3 ([Android](#), [iOS](#)) aims to keep those who are depressed or suicidal connected to your core network, asking you to choose three close contacts, such as friends, family, loved ones or your therapist, that you feel comfortable reaching out to whenever you feel down. It helps you build your own Safety Plan, asking you to think through and list your own warning signs, coping strategies and support network, so that you can easily act when you recognize your warning signs. It includes a wealth of suicide prevention resources and contact information for the National Suicide Prevention Lifeline.

Suicide Safety Plan Customize warning signs that a crisis may be developing, coping strategies for dealing with suicidal urges, places for distraction, friends and family members you can reach out to, professionals you can call, methods of making your environment safe, important reasons for living. App also contains an easy-to-access list of emergency resources so that help is just a tap away. For long-term recovery, we provide a thorough guide to dealing with suicidal thoughts.

Stay Alive This app is a pocket suicide prevention resource, packed full of useful information to help you stay safe. You can use it if you are having thoughts of suicide or if you are concerned about someone else who may be considering suicide. In addition to the resources, the app includes a safety plan, customizable reasons for living, and a life box where you can store photos that are important to you. Grassroots Suicide

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. Some of them may contain explicit language or content. Please see additional information about the Podcasts and Apps by following the hyperlink provided or by visiting iTunes. They are intended to be supplemental resources and are not meant to replace professional medical or behavioral health advice or services.

Prevention is a charity that supports communities to prevent suicide. We teach suicide prevention skills to community members and professionals. We work hard to raise awareness of suicide prevention and reduce the stigma surrounding suicide. Grassroots Suicide Prevention is not a crisis service.

Operation Reach Out is an iOS suicide prevention app aimed at veterans and military families. The app is intended to provide support for people having suicidal thoughts as well as friends, family or service members concerned that someone they know might be considering suicide. The app comes with numerous video vignettes offering suicide counseling, dos and don'ts when reaching out to a potentially suicidal loved one and a help center with suicide hotlines and other resources.

SEESAY Teen Suicide Prevention app combines real-time crisis intervention with community and social engagement. Supported by our official crisis services partner, CRISIS TEXT LINE and available as a FREE download via the App Store, the SEE Something SAY Something app connects teens in crisis to live, trained Crisis Counselors via text 24/7.

SafeStudents is the simplest way for students to report bullying and suicide concerns to school administrators at anytime, from anywhere, privately and securely using their own mobile device.

Just in Case provides support for students encountering a mental health crisis that may involve thoughts of suicide. Information on the app addresses these key areas of concern for students: I can't cope... I am worried about a friend... I might hurt myself or others.. The Resources section links students to organizations and services dedicated to helping in a crisis.

The App has been tested on college campuses since 2013, with hundreds of thousands of students having access to the app through their campus's counseling and wellness programs.

Moodpath is your pocket-sized mental health companion. Whether you are facing a rough patch or have concerns about your mental health, the app's goal is to support you through the difficult times and guide you out the other side. Moodpath asks daily questions to assess your well-being and screen for symptoms of depression. The screening progress aims to increase your awareness of your thoughts, emotions, and feelings. After a period of 2 weeks, the app generates an electronic document that you can discuss with a healthcare professional. More than 150 videos and psychological exercises are available to help you understand your mood and strengthen your mental health.

MoodKit is designed to help you apply effective strategies of professional psychology to your everyday life! With four integrated tools, it helps you: take action to improve your life; feel better by changing how you think; rate & chart your mood to monitor progress; and, develop self-awareness & healthy attitudes. It does a terrific job at making some of the general concepts of CBT available for people to work on by themselves or with the aid of a therapist.

MoodTools is a self-help app targeting depression. It provides psychoeducation about risk factors and psychosocial approaches to treatment, a depression symptom questionnaire (PHQ-9), a thought diary, a suicide safety plan, and videos such as meditation guides. It can also assist people without mental illness or people suffering from other mental disorders / mental illnesses such as anxiety, post-traumatic stress disorder (PTSD), bipolar disorder, seasonal affective disorder, dysthymia, obsessive-

compulsive disorder (OCD), panic disorder, generalized anxiety disorder, or schizophrenia.

WhatsMyM3 is based on a research validated screen that in 3 minutes assesses your risk of depression, bipolar disorder, anxiety and PTSD. After completing the short checklist you receive a personalized confidential report sharing how much burden these symptoms may be causing you. Please reach out to a professional or go directly to the emergency room should you feel a need for help.

HELPFUL RESOURCES: FOR NONSUICIDAL SELF- INJURY

WEBSITES:

Focus Adolescence Services

focusas.com

This website is designed for parents and covers a wide range of mental health problems; it has a section on self- injury, information and resources can be obtained weekdays only, 9 a.m. to 5 p.m. Eastern time, at 410- 341- 4216.

S.A.F.E. Alternatives (Self- Abuse Finally Ends)

selfinjury.com

S.A.F.E. Alternatives is a residential treatment program for people who engage in self- injury. The website includes information about self- injury and information about starting treatment. S.A.F.E. information hotline: 1- 800- DON'T CUT (366- 8288)

BOOKS:

Conterio, K. and Lader, W (1999) *Bodily harm: the breakthrough healing program for self- injurers*. Hyperion, New York, NY.

Written by the directors of the S.A.F.E. Alternatives program, this book is suitable for people who engage in self- injury and their families and friends. It includes case studies and diaries of people in recovery, tools for removing barriers to care, and information about the treatments suitable for self-injury.

Kettewell, C. (1999) *Skin game*. St. Martin's Press, Griffin, New York, NY.
A memoir of self- injury.

The author, an acclaimed author and journalist, engaged in a pattern of self- injury for many years, starting in early adolescence.

Levenkron, S. (1999) *Cutting: understanding and overcoming self- mutilation*. Norton Books, New York, NY.

This book is suitable for a range of audiences, including people who engage in self- injury, families and friends, and health professionals who wish to better understand the behavior. It explains the psychological motivations for nonsuicidal self- injury, common risk factors, and benefits of treatment.

PODCASTS:

Covers any and all topics that have to do with mental illness and the loneliness that too often ensues. Whether it is from stigma, misinformation, or plain old ignorance, people with mental illnesses rarely feel fully understood or accepted. This podcast will encourage you that you are, in fact, not alone. Join us in creating a community of people who fight this lonely battle together.

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. This is a podcast dedicated to answering your questions about mental health, anxiety, depression, relationships, sex, and life WITHOUT psychobabble BS. I am Dr. Robert Duff, a psychologist from Southern California, but I'm also a regular dude who legitimately wants to help out. I wrote the best selling books *Hardcore Self Help: F**k Depression* and *Hardcore Self Help: F**K Anxiety*. Those are available at <http://hardcoreselfhelp.com>

APPS:

The **Calm Harm** app tells us that the urge to self-harm is like a wave. It's strongest at the beginning, but if you ride the wave, it will soon be over. Apps are no substitute for a good therapist, but people who struggle with these moments of crisis say the right app really helps. It keeps a log of when you felt the urge and what triggered it. When you want help, you tell the app whether you'd like to try five one-minute exercises or a single 15-minute session.

My Shiny Thing acts as a distraction intervention, consistent with the evidence based research theory of Dialectical Behavioral Therapy. It empowers those who self-injure with an individualized coping tool to help manage the urge to self harm.

Self-heal has been developed in collaboration with potential users, clinicians and researchers to produce a tool that lets you take charge of your behavior. If you're self-harming, finding anonymous support can be tough. The app gives you a randomly chosen activity to do, either now ("write words on yourself with a red marker") or long term ("plan for the future: holidays, weekends away, job or study plans.") There's also a button that takes you to a library of motivational memes and cute pictures, and another for information on managing self-harm urges.

Moods: Tracking For Better Mental Health is the fastest and easiest way to record your current mood, which can be critical to maintaining good mental health. This one isn't just for self-harm, and it doesn't help you manage your moods. It just asks you what they are. Select whether you're feeling "good," "okay," or "bad," and then tag your mood ("lethargic," "furious," "☹️," etc) and add a note if you like. The app compiles a report of the moods you feel most often, and it can remind you at a set time of day to log your moods.

What's Up? A Mental Health App is meant for all types of mental health crises. If you tap the "help right now" button, you can choose between a breathing exercise, a random "name 5 things" game and a "catastrophe scale" where you can evaluate what's bothering you on a range from "everything in life is perfect" to "everything has fallen apart and it feels like it's all your fault." There's also a link to forums where you can talk to others. The app utilizes some of the best CBT (Cognitive Behavioural Therapy) and ACT (Acceptance Commitment Therapy) methods to help users cope with Depression, Anxiety, Anger, Stress and more!

HELPFUL RESOURCES: ANXIETY DISORDERS

BOOKS:

General Books

Bourne, E.J. (2010) *The anxiety and phobia workbook*. (5th ed.) Oakland, CA: New Harbinger Publications, Inc.

This is a self- help book based on cognitive behavioral therapy (CBT).

Levine, P. A. (2010). *In an unspoken voice: how the body releases trauma and restores goodness*. Berkeley, Calif.: North Atlantic Books.

Marks, I. (2001) *Living with fear*. McGraw- Hill Education, Berkshire, England.

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. Some of them may contain explicit language or content. Please see additional information about the Podcasts and Apps by following the hyperlink provided or by visiting iTunes. They are intended to be supplemental resources and are not meant to replace professional medical or behavioral health advice or services.

This book is based on CBT. It includes a very useful chapter on self- help for fears and anxiety. Research has shown that people with phobias who follow the instructions in this chapter improve as much as people treated by a professional.

Maté, G. (1999). *Scattered: how attention deficit disorder originates and what you can do about it*. 1st American ed. New York: Dutton.

Van der Kolk, B. A. (2014). *The body keeps the score: Brain, mind, and body in the healing of trauma*. New York: Viking. Chicago Style Citation. Van der Kolk, Bessel A. *The Body Keeps the Score: Brain, Mind, and Body in the Healing of Trauma*. New York: Viking, 2014. MLA Citation. Van der Kolk, Bessel A.

Panic Books

Antony, M.M., and McCabe, R. (2004) *10 simple solutions to panic: how to overcome panic attacks, calm physical symptoms, and reclaim your life*. New Harbinger Publications, Oakland, CA.

This small- format self- help book is based on CBT principles and may help people who experience panic attacks. The focus is on thinking realistically about future attacks rather than worrying about them.

Zuercher- White, E. (1998) *An end to panic: breakthrough techniques for overcoming panic disorders*. New Harbinger Publications, Oakland, CA.

This self- help workbook is based on CBT principles and may help people who experience panic attacks, panic disorders, and agoraphobia.

Phobia Books

Antony, M.M. and McCabe, R. (2005) *Overcoming animal & insect phobias: how to conquer fear of dogs, snakes, rodents, bees, spiders & more*. New Harbinger Publications, Oakland, CA.

This book is part of the “I Can Do It” Series. It uses a self- help approach to graded exposure, a form of CBT, for overcoming animal and insect phobias.

Antony, M.M. and Watling, M. (2006) *Overcoming medical phobias: how to conquer fear of blood, needles, doctors, and dentists*. New Harbinger Publications, Oakland, CA.

Medical phobias can lead to significant medical problems, as individuals may resist seeking medical help for emerging problems and emergencies. This book is part of the “I Can Do It” Series. It uses a self- help approach to graded exposure, a form of CBT, for overcoming medical phobias.

Social Anxiety Books

Antony, M.M. (2004) *10 simple solutions to shyness: how to overcome shyness, social anxiety, and fear of public speaking*. New Harbinger Publications, Oakland, CA.

This small-format book is an excellent accompaniment to the book listed below. Based on the principles of CBT, it may be useful not only to the individuals with a clinical disorder but also to those who are nervous in social situations or speaking in public.

Antony, M.M., & Swinson, P.R. (2008) *The shyness and social anxiety workbook: proven step- by- step techniques for overcoming your fears*. (2nd ed.). Oakland, CA: New Harbinger Publications, Inc.

This large- format self-help workbook uses the principles of CBT to help people overcome shyness and social phobia.

Stein, M.B., & Walker, J.R. (2002) *Triumph over shyness: conquering shyness & social anxiety*. New York, NY: McGraw- Hill.

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. Some of them may contain explicit language or content. Please see additional information about the Podcasts and Apps by following the hyperlink provided or by visiting iTunes. They are intended to be supplemental resources and are not meant to replace professional medical or behavioral health advice or services.

This self- help book is co- published and endorsed by the Anxiety Disorders Association of America. It may be useful for people with social phobia but also those who struggle with non- clinical shyness. A range of approaches is used.

Obsessive- Compulsive Disorder Books

Foa, E.B. and Wilson, R. (2001) *Stop obsessing: how to overcome your obsessions and compulsions*. Revised edition. Bantam Books, New York, NY.

A CBT- based self- help manual for overcoming OCD. Readers are encouraged to tailor a CBT program to target specific obsessions and compulsions. It also includes self- tests and case studies from the authors' significant clinical backgrounds.

The following four books are a suite of self-help workbooks that focus on practical strategies for overcoming specific types of OCD. By selecting the workbook that focuses on the main compulsive symptom (checking, washing, or hoarding) and then adding the workbook on obsessions, an individual can create his own CBT program for overcoming OCD.

Munford, P. (2004) *Overcoming compulsive checking: free your mind from OCD*. New Harbinger Publications, Oakland, CA.

Munford, P. (2004) *Overcoming compulsive washing: free your mind from OCD*. New Harbinger Publications, Oakland, CA.

Neviroglu, F. and Bublick, J. (2004) *Overcoming compulsive hoarding: why you save and how you can stop*. New Harbinger Publications, Oakland, CA.

Purdon, C. and Clark, D.A. (2005) *Overcoming obsessive thoughts: how to gain control of your OCD*. New Harbinger Publications, Oakland, CA.

HELP LINES:

**American Psychiatric Association Answer Center
1-888-35-PSYCH (1-888-357-7924)**

Live operators, available from 8:30 a.m. to 6 p.m., Eastern time, refer you to local board- certified psychiatrists.

APPS:

Anxiety Reliever is an app that enables users to track anxiety symptoms and provides relaxation exercises. A limited version of the app is available for free and the full app can be bought.

Anxiety Coach is a self-help app that addresses fears and worries using CBT strategies. The app walks you through making a list of feared activities and helps you master them, leading to less fear and worry. The app includes tools for a severity self-test, making a plan, anxiety tracking, and viewing your progress.

Pacifica is an app with anxiety and stress in mind. It provides a toolbox to deal with daily anxiety and stress, along with a highly supportive community of like-minded individuals. It helps you break cycles of unhelpful thoughts, feelings, and behaviors through methods such as CBT, mindfulness meditation, mood tracking, and relaxation. The app houses audio lessons and activities that help you learn to cope with stress and depression, and it sets daily challenges to help you tackle anxiety one day at a time and reach your long-term goals.

Anxiety Relief Hypnosis is an app suggested to help improve relaxation and reduce anxiety within just 1–3 weeks of use. The app's developers say that hypnosis can decrease anxious thoughts and enhance your response to relaxation, which, in turn, resets your behavior and enables an improved response to stress. The app provides an audio session read by a certified hypnotherapist together with calming music and sounds from nature to aid relaxation. The "awaken at end" feature can be disabled to allow you to fall into restful sleep at bedtime.

OCCHD Wellness Now does not endorse any of the books, podcasts or Apps listed in this document. They have been reported to be helpful by members or the patients that they serve. Some of them may contain explicit language or content. Please see additional information about the Podcasts and Apps by following the hyperlink provided or by visiting iTunes. They are intended to be supplemental resources and are not meant to replace professional medical or behavioral health advice or services.

Breathe2Relax is a portable stress management tool which provides detailed information on the effects of stress on the body as well as instructions and practice exercises to help users learn the stress management skill called diaphragmatic breathing. Breathing exercises have been documented to decrease the body's 'fight-or-flight' (stress) response, and help with mood stabilization, anger control, and anxiety management. It can be used as a stand-alone stress reduction tool, or can be used in tandem with clinical care directed by a healthcare worker.

Panic Relief Free is targeted to help individuals with panic disorder access easy-to-use, empirically supported coping tools to better manage and move through panic attacks. The free version includes access to progressive muscle relaxation of the arm skill, while the upgrade allows access to the rest of the skills, including square breathing, diaphragmatic breathing, and progressive muscle relaxation.

MindShift is an app targeted to help adolescents, teens, and young adults gain insight into and basic skills to manage symptoms of anxiety disorders, including GAD, social anxiety, specific phobias, and panic attacks. It's also useful for managing worry, performance anxiety, test anxiety, and perfectionism. The skills taught may be applied to individuals with physical, emotional, cognitive, or behavioral manifestations of anxiety, providing users with more helpful, balanced ways of thinking about feared situations. Tools such as breathing exercises, mental imagery, and mindfulness strategies are provided in text and audio format.

PE Coach 2 is designed to be used during therapy for posttraumatic stress disorder (PTSD) with a health professional who is trained in Prolonged Exposure (PE) therapy. The app will guide you through the exercises assigned by your therapist and allows you to track and record your progress. In addition, the app provides techniques such as controlled breathing that will help you tolerate and decrease your distress. This app will help you remember and track your upcoming therapy sessions. You will be able to audio record your sessions directly onto your phone so you can review them later as part of your treatment. This app was created by VA's National Center for PTSD.

PTSD Coach was designed for those who have, or may have, posttraumatic stress disorder (PTSD). This app provides educational information about PTSD, professional care information, a self-assessment for PTSD, opportunities to find support, and tools that can help manage the stresses of daily life with PTSD. Tools range from relaxation skills and positive self-talk to anger management and other common self-help strategies. Customizable tools based on personal preferences and integration of contacts, photos, and music. This app can be used by people who are in treatment as well as those who are not. It was created by VA's National Center for PTSD and DoD's National Center for Telehealth & Technology.

SAM (Self-help for Anxiety Management) is a friendly app that offers a range of self-help methods for people who are serious about learning to manage their anxiety. SAM has been developed by a university team of psychologists, computer scientists and student users. Established methods of self-help have been combined with high standards of usability to provide an engaging, flexible, and practical resource.

Worry Watch – Anxiety Journal For individuals with chronic worry, anticipatory anxiety, and GAD, this app provides simple self-monitoring and documenting of worry within a pre-fixed menu, as well as a graphical tool that charts the worry entries by various factors. It also prompts the user to think about whether the he or she believes the actual worry was as bad as what actually happened. Picked as one of the best anxiety apps of 2017, 2016 and 2015 by Healthline.com.

HELPFUL RESOURCES: FOR DISORDERS IN WHICH PSYCHOSIS CAN OCCUR

Quit That! Track & Stop Habits Are you looking for a totally free app to help you quit stuff without pesky ads, limits, or annoying prompts? Quit That! is a simple app to track all of the stuff you are trying to quit. Want to quit smoking? Quit That! Looking to stop drinking soda? Quit That! too.

recoveryBox Addiction Recovery Toolbox Designed for addiction recovery and accountability, this app is a sobriety toolset that facilitates tracking of daily life activities easily breaking them down into your "lights". Breaking habits requires knowing why we do what we do, when do we do it, and coming up with a plan to break the habits. Keep track of your daily activities using this simple light system and email/text directly from the app to your sponsor, accountability partner or counselor.

Sober Tool – Alcoholism & Addiction Recovery Help Developed by a Harvard educated Licensed Chemical Dependency and Certified Alcoholism Counselor with over 27 years clean and sober and a team from The Ohio State University, this app is based on proven techniques to help you stay clean and sober. It doesn't matter whether it's alcohol, food, sex, cocaine, marijuana, gambling, spending, heroin, the internet, or anything else, SoberTool gives you free, immediate help. It actually trains coping skills. There is also confidentiality regarding information you enter because it is stored only on your device.

Pear reSET™ is a mobile digital therapy for treating substance use disorder. It contains a series of interactive therapy lessons with information to help support your recovery. Each lesson can be read and listened to at your own pace. After you have completed a lesson, a short quiz ensures you are familiar with the content you reviewed. Virtual rewards are offered each time you complete a lesson and quiz combination. This therapy is designed as a 12-week program requiring weekly check-ins. Your progress is available for review by your doctors and therapists to help improve communication between clinic visits. NOTE: reSET™ is a prescription product. To access, you must have a prescription from your provider and a prescription access code. Providers can include physicians, nurse practitioners, psychologists, registered nurses, or any authorized therapist or treatment counselor treating patients for substance use disorder (SUD).

APPS:

RR: Eating Disorder Management Recovery Record app is a comprehensive resource that focuses on key approaches to promote recovery and positive body image. Keep a record of the meals you eat and how they made you feel when you ate them through this app. Read reflections and affirmations along your recovery journey, collect “jigsaw pieces” for positive behaviors, and complete questionnaires that’ll help you track your progress over time. You can also link your app to your treatment team so they can provide encouragement and feedback.

Rise Up + Recover: An Eating Disorder Monitoring and Management Tool for Anorexia, Bulimia, Binge Eating, and EDNOS is a unique app that allows you to track your meals and how you’re feeling when you eat them. It allows you to transcribe your progress into a PDF printout that you can share with your treatment team. For people looking for quick coping strategies whenever they have an urge to binge or skip a meal, this app offers easy to access coping strategies to encourage you to continue a healthy lifestyle.

recoveryBox Addiction Recovery Toolbox Designed for addiction recovery and accountability, this app is a sobriety toolset that facilitates tracking of daily life activities easily breaking them down into your “lights”. Breaking habits requires knowing why we do what we do, when do we do it, and coming up with a plan to break the habits. Keep track of your daily activities using this simple light system and email/text directly from the app to your sponsor, accountability partner or counselor.
