

Wordy Wise Beak!

To join in the fun, we made a Beak Hat to look just like our friend Wordy Bird!

Items needed:

Basic Foam visor**

Foam sheets, any color or pattern to make the beaks. (pattern below)

Google eyes

Black marker and glue

** you can use a paper plate and pipe cleaner to make the visors**

We began with a basic white foam visor that can be purchased from many sources (Hobby Lobby, Wal-Mart, Amazon and Oriental Trading to name a few). The cost is between \$0.40 and \$0.80. We then cut a "beak" from foam sheets using the pattern below. Draw on the nostrils with a black marker. Then glue the beak to the visor with the points placed on the edge of the visor. Add Googly eyes using glue.

** We found that if you are going to wear the visor outside, using Gorilla glue keeps them together. If wearing inside, any glue that you can use on foam will work. It is preferable to use a quick drying adhesive.

Beak pattern:
